Exceedance Information	While the 5 day cumulative rainfall at the time of these exceedances (EPA Points 2 & 21) did not reach 62.1 mm (EPL 13091 L2.1) they are attributable to the rainfall received. The above exceedances were primarily a result of the upper western sediment basin (DP01) being offline during the month to allow enlargement of the basin from 2ML to 8 ML capacity. KEE is currently preparing a TSS Reduction Plan to further address this issue. Erosion & sediment control activities continue to be carried out on both a routine and continual improvement basis.
